

TMAC Concrete Cleaning

Clean concrete says a lot about your property.

Residents and customers appreciate and feel safer in clean, well maintained surroundings, especially tourists who aren't familiar with the area. Your parking garage, sidewalks and front entrances are some of the first things guests, residents and customers see when arriving at your property.

Community sidewalks and curbing can be cleaned and will not only help beautify your community, it also can help eliminate slip & fall accidents from dirty, moldy concrete.

Parking garages should be cleaned at least once a year, and in high traffic garages, twice a year. Our commercial grade equipment and degreaser can remove the oil and grime we find in garages. It also will also help in maintaining the rest of your property and help cut down of tracking of oil and grime throughout homes and businesses.

Let us help make that first impression a good one!

REGULAR MAINTENANCE CLEANINGS

If you operate a hotel, resort or housing community you know how often the concrete in your high traffic areas such as front entrances, parking garages, dumpster areas and sidewalks can become dirty, oily and covered with gum. Our regular maintenance cleaning contracts can be **designed to fit any schedule and budget.**
